(803) 748-1345

**COMPLETION DATE**

March 2012

**SIZE**

12,800 SF

**AWARDS**

C.P. Quattlebaum Design Award

- New design-build facility includes a gymnasium, classrooms, a canteen and a lobby featuring polished concrete. Design also provides for 2,500 SF of future upfits in the second floor office and recreation areas including future elevator requirements as well as HVAC and electrical component designs. All finishes were coordinated directly with the owner to ensure adherence to client standards while including upgraded features such as real hardwood basketball court floors; bleacher, goal and padding selections; and additional safety glazing at the baselines.
- Additionally, upgrades in the restroom and canteen areas (including casework/ countertop upgrades and lockers) not originally part of the contract were included after Mashburn worked diligently to incorporate them into the budget.
- The Center was recently honored with the C.P. Quattlebaum Design Award for the addition of the facility and for overall revitalization of the old campus in the area.
