May 2013

SIZE

7,200 SF

- This fine dining restaurant and bar was part of a historical restoration and renovation that combined three buildings for Hotel Florence.
- Located in the lobby of the hotel, Victor’s Bistro seats 200 indoor and 20 outdoor patrons. Midway through the project, the scope was increased to a fourth historic building that included a walk in cooler, office space and planned expansion for additional dining areas.
- In addition to providing the renovations, Mashburn was involved early in the project and worked extensively with the design team to provide preconstruction services.
- Our team worked diligently to complete the restaurant on an aggressive schedule concurrently with the restoration of the hotel.
- The construction was coordinated to minimize disruption to pedestrian and vehicular traffic.
