COMPLETION DATE

January 2015

SIZE

95,170 SF

- In response to a demographic boom in the area, Hilton Garden Inn selected Mashburn Construction to build this new, 130-room hotel.
- The six-story facility, which replaces a 27-year-old Master’s Inn, also includes a 2,500 square foot meeting room, elevated patio pool and an additional outdoor event and meeting space.
- With over 28 weather delays, the Mashburn team completed the project by minimizing the impact equivalent to five weather delays.
- The facility was constructed using metal stud and composite concrete slab construction.
- Mashburn also provided value-engineering services on this project, helping the owner to reduce the budget by over \$1,000,000.
