AWARDS

Gold Honor Award, 2011 Fire Industry Equipment Research Organization

- The town of Surfside Beach, SC determined that the 1970's pre-engineered structure housing their fire safety operations and emergency operations center had outlived its useful life and needed to be replaced.
- Although the Town elected not to pursue LEED certification, sustainable materials were incorporated where practical.
- The structure utilizes concrete cast in place and structural steel.
- The new two-story fire headquarters and emergency operations center replaced the existing facility and encompasses:
 - Four drive-through fire apparatus bays
 - Cascade room, gear and equipment storage, and de-con area
 - Emergency Operations Center
 - Administrative offices
 - Classrooms
 - Dorm/living quarters & exercise area
 - Emergency electrical power generation system
