COMPLETION DATE

March 2015

SIZE

15,632 SF

- New addition that added 30 beds to the existing campus and provides hospice care and skilled nursing services.
- The large site provided ample laydown area; however, a few challenges were discovered after our team broke ground on the project. A considerable amount of rock was unearthed – the rock was either excavated or plans were reconfigured to assure that the soil was suitable for the facility. Additionally, a 15’ retaining wall was necessary on the rear of the site. The completed site now includes a building pad and parking lot area for future business endeavors.
- The single-story, wood-framed structure features a brick and vinyl siding façade and an architectural shingle roof. Other features include a porte-cochere, dining and activity rooms, a beauty salon and a laundry room.
- To lessen the disruption to neighboring businesses, Mashburn scheduled the necessary concrete pours early in the morning.
- This completed addition is connected to the Agape Senior Lexington Assisted Living Facility (also constructed by Mashburn) by a golf cart path.
