COMPLETION DATE

September 2009 (Phase I)
January 2013 (Phase II)

SIZE

14,475 SF (Phase I)
11,800 SF (Phase II)

Phase I

- The church issued an RFP, interviewed the short-listed firms and then selected Mashburn for their new multi-purpose worship center and classroom facility.
- Design-build project where Mashburn was responsible for both design and construction.
- Exemplified our open-book policy of providing fair and accurate estimates based on preliminary, schematic drawings.
- Team developed creative solutions to design and build a functional building to meet both aesthetic and financial needs.

Phase II

- This new worship center doubled the size of the existing sanctuary for the congregation.
- The entire facility now contains a full fire sprinkler system.
- Features include a stained concrete floor in the lobby area, exposed wood trusses and a beverage area.
