COMPLETION DATE
March 2010

SIZE
13,000 SF

- As a result of money saved in a previous Mashburn/Beaufort County project (Buckwalter Community Center), Mashburn constructed a new, 13,000 square foot recreational skateboard park with covered pavilion and benches.
- This design-build effort with Beaufort County represents a fully customized concrete skate park for all skill levels and included custom steel rails, bowls, ramps and stairs. The skatepark also includes one block building with women’s and men’s restrooms and a small open covered area with two picnic tables and two regulation size soccer fields.
- The project involved additional site drainage as well as a recreational shaded free-standing pavilion structure.
- The skatepark engages users by offering a balance of street, plaza, and transitional style areas.
