COMPLETION DATE

November 2014

- This bistro restaurant was part of a historical restoration and renovation for the Inn at Crossroads Hotel.
- The façade of three historic storefronts was preserved and restored for the exterior; the new brick hotel structure was constructed behind it.
- Several sustainable elements were incorporated into the project, including stormwater runoff capture for the courtyard gardens and LED lights in the parking areas.
- Our team worked diligently to minimize disruption on this tight downtown site.
